Master's thesis

This shall be a great thesis paper with an extremely long title but who cares

Some theses even have subtitles

List of Tables

Chapter 1

The very first chapter with a very long title just to see what it looks likes since it also spans multiple lines in the ToC

1.1 A very first section

For figures the guidelines are:

- Always center images using `\centering` as the very first command of the `figure`-environment.
- Make sure to set the width of your included images explicitely using the `width=\linewidth` option.
- Don't forget to keep the aspect ratio of images if you change their width.
- Never ever under sample images. In other words: never ever enlarge images.
- It's best to use vector graphics i.e., `*.eps` or `*.tikz` for proper quality in both PDFs as well as on screen.
- Add a caption to your image. Captions must be below the image.
- Let the labels be handled automatically by LaTeX. A best practice is to set the prefix of figures' labels to `fig:`.
- For a good example see Fig. 1.1 and its code at **??** (this reference was created using the `\cref{}` command).
- Always add a full stop to your figure captions like so.

Figure 1.1 A sample figure to show the effect of a loooong looooong caption. Credits by `https://www.flickr.com/photos/schubi74/14942249547/`.

1.2 Referencing

Referencing may be done using `\ref{label}` even though usage of `\cref{label}` is encouraged for that it automatically typesets the appropriate type like `Eqn.` or `Fig.`, `Tbl.`, or `Listing` to whatever is being reference. At the beginning of a sentence `\Cref{label}` must be used to fully the referenced type in words. Figure 1.1 refers to a sample figure at the beginning of a sentence, while Fig. 1.1 refers to a sample figure in text.

- Capitalise and write in words the reference object at the beginning of a sentence
- Otherwise use the abbreviated forms of `Fig.`, `Eqn.`, and `Tbl.` for referencing figures, equations, and tables, respectively
- Refer to the `cleveref` package documentation at `http://www.ctan.org/pkg/cleveref`
