THE MAIN TEMPLATE

3.1 Document Structure

Basically you are free in organizing your document, however, it is recommended that a certain order of chapters is always obeyed to which is

1. Table of Contents
2. List of Figures
3. List of Tables
4. List of Abbreviations
5. List of Symbols (math symbols and alike)
6. List of Abbreviations (textual abbreviations like e.g., CDPR)

For figures the guidelines are:

- Always center images using `\centering` as the very first command of the `figure`-environment.

TABLE 3.1: *A sample table*

Item		
Animal	Description	Price (\$)
Gnat	per gram	13.65
	each	0.01
Gnu	stuffed	92.50
Emu	stuffed	33.33
Armadillo	frozen	8.99

- Make sure to set the width of your included images explicitly using the `width=\linewidth` option.
- Don't forget to keep the aspect ratio of images if you change their width.
- Never ever under sample images. In other words: never ever enlarge images.
- It's best to use vector graphics i.e., `*.eps` or `*.tikz` for proper quality in both PDFs as well as on screen.
- Add a caption to your image. Captions must be below the image.
- Let the labels be handled automatically by L^AT_EX. A best practice is to set the prefix of figures' labels to `fig:`.
- For a good example see Fig. 3.1 and its code at ?? (this reference was created using the `\cref{}` command).
- Always add a full stop to your figure captions like so.

3.2 Referencing

Referencing may be done using `\ref{label}` even though usage of `\cref{label}` is encouraged for that it automatically typesets the appropriate type like `Eqn.` or `Fig.`, `Tbl.`, or `Listing` to whatever is being reference. At the beginning of a sentence `\Cref{label}` must be used to fully the referenced type in words. Figure 3.1 refers to a sample figure at the beginning of a sentence, while Fig. 3.1 refers to a sample figure in text.

- Capitalise and write in words the reference object at the beginning of a sentence
- Otherwise use the abbreviated forms of `Fig.`, `Eqn.`, and `Tbl.` for referencing figures, equations, and tables, respectively
- Refer to the `cleveref` package documentation at <http://www.ctan.org/pkg/cleveref>
